Compromise Assessment

Supported by Highly Skilled Analysts

SMX®

Advanced Cyber Security Service

SMX® Deep Threat Detection

We Can Reveal What You Don't Know About Your Environment

> Have malicious attackers previously accessed my environment?
>
> Are malicious attackers currently operating in my environment?
>
> How do I detect and respond quicker to future advanced attack attempts?

We help organizations by detecting and hunting down advanced malicious attackers with...

- Seasoned analysts at the leading-edge of offensive and defensive operations
- An intelligent platform that applies adversary behavior, machine/code learning, and advanced security analytics
- A multi-tenant and stealth-like capability that's agentless and circumvention resistant
- Early detection and faster response for APT and other unknown threats
- A team that works for you alongside your existing security technologies and processes

This assessment is for CEOs, CIOs, CISOs, SOC Directors, Boards, and IT Teams.
