

Elevate FM: Financial Management Built for Government

Maximize efficiency and mission impact by streamlining every phase of your agency's financial management processes.

Elevate FMSM helps federal agencies quickly transition their financial management operations to a secure cloud platform built for speed, flexibility, and scalability. Built on the Oracle Fusion Cloud platform, Elevate FM strengthens Oracle's Federal Financial Management capabilities through its pre-configured solutions for Federal Procure to Pay, grants disbursement, travel reimbursement, cash receivables, and reporting.

To quickly achieve results and maximize impact, Elevate FM also features a comprehensive library of pre-built integrations, tools tailored specifically for federal needs, and automation powered by AI. The result? Predictable costs, accelerated workflows, and greater efficiency.

Elevate FM is one of only two financial management "Core FS" solutions available through the Department of the Treasury's QSMO marketplace. With Elevate FM, agencies can achieve greater efficiency, sharpen reporting, and keep costs and resource demands under control.

Technical Capabilities Include:

- Integration with Agency-specific systems
 - Additional Agency-specific reports
 - Data conversion
-
- Data conversion templates & additional reports, incl. status of funds, P-Card reconciliation, and enhance req/PO approval
-
- Integration with Federal systems
 - AI-enabled solutions

Agency Specific

SMX Elevate FM (QSMO Core FS)

Oracle Federal Cloud ERP

Proven Oracle FedRAMP High Cloud Infrastructure Platform

Functional Capabilities Include:

- Agency-specific enterprise configurations
 - Mission-specific business process implementation
-
- Federal configuration accelerators, incl. COA, set of book, budget execution templates, and SLAs
-
- Common government-wide ACS (CGAC)
 - OMB government-wide business standards
 - Treasury and OMB-compliant reporting

AI-powered capabilities enable Elevate FM to streamline your business processes and deliver better insights as missions, goals, and budgets evolve. Our as-a-service delivery model expedites your move from costly labor to a focus on automation and outcomes.

With Elevate FM, federal agencies can rapidly migrate from their current financial management systems, including Oracle EBS, SAP, and CGI, to a more scalable, adaptable environment – one that helps agencies be more responsive, accountable, and efficient.

Unlock greater efficiency, enhanced analytics, and an exceptional user experience.

Trusted Oracle cloud platform

Achieve financial management transformation without disruption.

Elevate FM shifts your financial management environment to a powerful, cloud-based Oracle Fusion Financials platform. We take these capabilities further with our growing library of pre-built tools aligned with federal accounting practices, including governance and role-based controls, reporting, automated invoicing, and detailed process lifecycle dashboards.

Efficient, cost-effective delivery model

Get the precise capability you need on demand.

Available through the Treasury Department's QSMO marketplace, our outcome-focused SaaS solution means fixed-price delivery and predictable costs and relieves the burden of maintenance and on-site support for legacy systems. SMX expertise is available as needed for cost-effective customization without long-term contracts.

AI-powered analytics

Save time and free up resources for higher-level decision making.

Elevate FM's intelligent AI-powered automation platform includes 20+ services that eliminate manual inefficiencies, increase accuracy, and leverage data from across the agency, empowering fully informed insights. Repetitive tasks and higher-level analysis run smoothly in the background, enabling agencies to adapt to fast-changing situations with accurate answers at mission speed.

Focus on outcomes, not hours.

Slow, expensive time and materials contracts have had their day. Elevate FM follows a product-oriented delivery model that ensures maximum efficiencies, predictable costs, and strict schedules with clear, specific results.

Built from the ground up as a SaaS solution, Elevate FM is designed to control costs, ensure performance, and scale easily to meet changing demand. Our goal aligns with yours: to deliver capabilities that quickly and efficiently drive greater productivity and enable better decisions.

Business as usual is over

Instead of missed opportunities and costly labor, Elevate FM delivers the pre-configured, industry-standard power of Oracle Cloud Fusion Financials, enhanced to meet federal financial management requirements and standards.

Easy to acquire through the Treasury Department's QSMO marketplace, quick to implement, and cost-effective to operate, Elevate FM empowers agencies with an AI-driven environment that streamlines financial management operations – getting you from data to insights faster.

SHARED VISION. OUTCOME ASSURED.

SMX harnesses the transformative power of technology to achieve mission success.
